Step 1: Draw All Characters Together as Basic Shapes

In this step, we are only drawing the overall shape of each character. For example, a doughnut is just a circle.
Think of each shape as a paper cut-out, and imagine overlapping the shapes in a collage. Here is the same drawing, but each shape is drawn in a different colour.

Step 2: Add Decorations as Basic Shapes

Now add the decorations, still keeping them very simple with no details. Feel free to draw right through the other shapes.

You can see that I didn't draw the full soda glass, only the top of it and the straw. It felt like too much work for something that will be erased any way. You can make those kinds of decisions along the way, based on what you feel comfortable with.
Step 3: Add Details To All the Characters

This step is the big one. It might look overwhelming, but you already know how to draw everything you see here. These are the same characters you've already mastered. They are just all sitting next to each other now.

Take it one character at a time, follow the tutorials, and it will work out beautifully.

Step 4: Outline With a Pen

Outlines take time, but they are not hard. Just grab a pen and go over all the pencil lines. This is the fun part. :)
Once the pen is completely dry, erase the pencil lines. To make the drawing even cuter, you can thicken the outlines of the main characters. This will make them really pop. Like this:

Thank you for coming on this drawing journey with me. I hope you enjoyed it. But most importantly, I hope you achieved what you wanted.

E-mail me your drawings at tatyana@kawaiidrawings.com - I would love to see what you create!
